Clean India Mission

Cleanliness is a good habit. It is mandatory for all of us and is very important in India. Cleanliness is very important, but in India, all the human beings are not doing this thing. So to keep our India clean, we want to tell in all schools. Clean India mission is very important if we clean India. The India will be glorified. And, if India gets glorified, we start having to do cleanliness everyday. Cleanliness is very easy. You know it. Just wash your hands. You know it. What is this? We have no time to stand and slaves? It is a very good thing. The Davis will say. But to clean India, we have to do time, pick

"Clean India, make Green India"
"Make India Clean India"
So that we may live with a clean and green India. There are many things to clean India. But I think only one type of clean which is water.

"India is Clean"
Make all the places Green

So please kindly clean India and make India Green.

up the time but we don't take care of time and when my father go to get money for us and we also don't have time to stand and clean. No time to go when sounds like "where squirrels hide their nests in grass. And it was clean. In India, we are not clean. We are not clean. Cleaning India is a very good thing. So clean India. Get many knowledge. Make India a clean garbage. No show the garbage. Get rid of it and the things that make the India very dirty. So to make clean India. In India, we will start to do cleaning in India. And to clean India, we have to take time for do this. So, please kindly clean India. Do not throw the garbage outside. And at garbage, please pick up the garbage and be planning. Keep it in one place. We have to plant two trees. It is a good method. It is everyday. In India, all people clean and green. I will try to make the world about this in the next page.

Clean India Mission

We clean our classroom, we clean our surroundings, our responsibility to clean our houses, class, surroundings etc.

If we clean our surroundings then the air is pure and air is cool. We know our shoes become dirty, dirty, we keep clean our surroundings by wiping the we keep dustbin, we make a basket and keep it, if we do not clean our surroundings then we suffer from disease like typhoid, malaria etc. So our surrounding measures are more than we suffering

from diseases. We throw garbage in it, since therefore the river water is dirty, we throw decompost material in hole and also throw sand.

Essay Topic - @ Be clean. Be happy
@ Hygiene and cleanliness

TOPIC: BE CLEAN
BE HAPPY

BE HAPPY BE CLEAN This thought you NEED LISTEN ABOUT IT that if you clean your life is important to be a happy person. Happiness is not necessary in our life. Clean environment is more important. If your surrounding area is clean you will feel better in that area. If your surrounding area is full with dust and garbage you will feel so dirty. Your surrounding area will make you happy. So cleanliness is important.

So for your happiness you have to clean and green your surrounding areas. You have to throw the garbage in dustbin not in your surrounding or near by your house or near the street or any other place. Throw the garbage in the dustbin not in other roadside. Be safe. Be happy. You all know that garbage is the very big problem. It causes so many pollution. If disturbing the environment the birds and animals which are not seen in today's environment. use cannot be so many birds which is seen by ancient time where not seen by now. Modern time because they all are not happy in today's life. They are not feeling better here because of the so many garbage surrounded by so many garbage for them they have to lived here very free they don't own any garbage nest by them. The garbage for their happiness are have to decrease the amount of garbage. Go green. Go clean. Be happy. Be safe. Be clean. Your surrounding area and be safe your life. Live happily.

Hygiene and cleanliness

Hygiene and cleanliness is very important for your life because environment is protecting sheet. cleanliness is for us important for us. Environment are not clean so people come diseases very types of diseases malaria, dengue, etc. Do not come scurvy because environment is not clean if we destroy it it recover us, environment is not de pollution will by people disease dangerous. So day to day the people destroy this environment, specially how many industrial. In our country how many industrial. In this country throw chemical & vessel. In this case, collect lot of carbon dioxide and then pollute environment. So many people put to the garbage to water. Sometimes the activity industrial, they put their garbage, chemical to the water. We can get many information regarding this from T.V. & newspaper. So what happen this case pollute of water many time the fisher killed. It will be poisonous. & also many people get disease.

Don't pollute water

Don't pollute air

Don't pollute environment

Don't pollute yourself
