

**Scrutiny comments on the Review of Mining Plan of Beldongri mine of M/s MOIL, Tahsil Paraseoni, District Nagpur, Maharashtra for an area of 26.66 hect. submitted under rule 17(1) MCR 2016.**

- 1) Under heading detail of earlier approved mining plan /scheme of mining, the dump production mentioned on page no 6 is not matching with the annual returns submitted to this office.
- 2) Under heading mineral reserves on page no 9 and it is mentioned that total reserves as on 1.4.2012 are 376715 T but instead of that it is to be mentioned that the total mineral resources as on 1.4.2012 are 376715 T which include 321755 T reserves under 111 and 121 category and 54960 T of resources under 221/222 category. Accordingly correction are to be made.
- 3) Under heading life of mine on page no 19, the life of the mine is calculated based on the total reserves and resources, whereas the same is to be calculated on the total proved reserves (111+121/122) Need correction.
- 4) Updated Geological cross sections are to be enclosed.
- 5) In annexure XXI, it is mentioned that the environment clearance accorded under the provisions thereof to the Beldongri manganese mine of MOIL for annual production capacity of 5000TPM of manganese ore involving total lease area of 65.20Ha, whereas in the said document the lease area is 26.66 ha . Needs clarification.
- 6) Plan showing proposed U/G development at different levels is not submitted
