13(1)	The mining operations in the lease area are not carried out as per approved modified mining plan and following deviations are observed during inspection. a) It was proposed in Para 7.3b & plate 8A to use the generated waste for road preparation and environment measures during 2012-13 and for partial backfilling in subsequent years. Topsoil generation was not expected, however proposed for use in plantation, if any found. It was observed during inspection that topsoil stack is there and advanced beyond lease boundary in southern side of lease area. Further, different grades of mineral stacks are advanced beyond lease boundary in southern & western side of lease area.
