

SCRUTINY COMMENTS ON DRAFT REVIEW OF MINING PLAN ALONGWITH PROGRESSIVE MINE CLOSURE PLAN OF AJITABURU IRON & MANGANESE ORE MINE (OVER AN AREA 46.62 HECTS.) OF SMT. DEVKABAI VELJI, LOCATED IN VILLAGE-GHATKURI R.F. (SARANDA FOREST DIVISION), DISTRICT – WEST SINGHBHUM (JHARKHAND) SUBMITTED BY SHRI RAJESH DHIRAJLAL ATHA UNDER RULE 17(2) & 23 of MCDR 2017.

Note : As per Rule 12 (4A) of MCDR 2017 entire mineralised area should be explored in G2 level before 1st Day of April 2019, as such proposal of exploration should be given in entire area. The proposal of exploration should be marked in Geological Plan & Section also.

1. Pg. 2-vi – corner pillars should be demarcated properly.
2. Pg. 3-vi - Date of compliance cannot be treated as compliance of violated Rule as the entire mineralised area has not been explored in G2 level.
 - a. As per Violation Letter Issued on 27/06/2018 FMCP Under Rule 24 (1) of MCDR 2017 is not submitted to the Competent authority for approval by the Lessee as such violation of Rule 24(1) still exists.
3. Pg. xvii, xviii & xix – Volume in Tonnage & Volume in tones is to be corrected accordingly.
4. Pg. xix – Table 1.8 check the calculation for section line as section line 2452415 N to 2452915 N only contains Iron ore 2452215 N & 2452315 N section line are of Mn ore As such it is to be shown separately.
5. Table 1.13, 1.14 & 1.15 section line 2452215 N has been taken twice for calculation, moreover the length of influence is to be checked again.
6. In table 1.12 and table 1.16 mention the average grade of iron & Mn ore respectively.
7. Plate no. 6 – same lithology should have same index and the UNFC Classification is to be demarcated by a boundary line with different colours. Same lithological symbol is to be used in Geological Plans & Section.
8. All plans & sections should be certified by mining engineer & appointed Geologist of the mines as stipulated under Rule 34 of MCDR 2017.
