

Heading

- 1) The Rule for ROMP will be RULE17(1) of MCR-2016 instead of RULE 17(2)- it should be changed accordingly wherever required.
- 2) The Rule Quoted 23(B) of MCDR-2003 instead of rule 23 of MCDR-2017- it should be corrected.
- 3) The “ Mining Plan” should be replaced as “ Review of Mining Plan” wherever quoted.
- 4) Mining Plan Period should be replaced by “ Review of Mining Plan Period”

General:-

1)page-4 (f).Certified copies of educational qualifications and experience of qualified person may be enclosed.

2) Document has been prepared by 2 qualified persons. Only one qualified person needs to be prepared may be submitted.

Location and accessibility :-

1)The leaseperiod of is to be corrected as per MMDR-2015.

Part –A

Geology and Exploration

LOCAL GEOLOGY

1)page-15-The Details of Prospecting /Exploration Agency is to be given.

2)Page-25-26-27:-The details of the Reserve and Resources derived form the Geological Plan/geological section should be explained in details with parameters i.e thickness of limestone taken and tonnage factor.

Mining-

1)The cost of mining is to be given.

2) The notation used in rate of production should be given.

3) the Number of Excavator is calculated for the year 2016-17 and 2017-18 whereas it should be given for ROMP period. (accordingly, all equipment requirement should be changed)

4) page-41 – Only the balance limestone should be mentioned.

PMCP-

1) Page-72-761)All “nil” table is not acceptable.

a) In items (A) Reclamation and Rehabilitation of mines out area should be rehabilitated by massive plantation as during the Plan period approx. 20 Ha of land will be available for plantation as well as the removal of existing topsoil can be spread over it.

2) Proposal for reclamation and rehabilitation of backfilled area with afforestation should be given with massive plantation activities after putting the topsoil.

3) The locked-up benches should be spread with some topsoil over it and adequate plantation should be proposed.

4) proposal of garland drains and parapet wall should be given for all dumps and mineral stocks.

(all the above proposal should be given in all relevant plates and conceptual plan.)

Plates

1) Lease plan and surface plan should be signed with date by surveyor and mines manager and all other plans should be signed by only one qualified person with date.

2) PLATE NO 5E& 07- The Vth year plan does not show IVth year refilling status.

3) Plate No- 06- The UPL shown with height of 5 meter and width of 8 Meter will keep minerals in locked up benches more hence it should be corrected- mainly along ML-5,6,7,8.

4) In plate No-07- Conceptual Plan and Environment management Plan should show massive afforestation in backfilled area as well as locked up benches by spreading top soil after removing all category (111) reserve.

Annexures:-

1) photographs of erected boundary pillars should be enclosed.

2) Copies Educational qualification certificate and experience certificate of qualified person should be enclosed.

1. The roads passing through patta land 42, 43, 47 etc. is as plotted in the lease plan is not matching with the other plans. The reason for the direction may be justified with the supporting document.

2. The vari course running along S.F.No.67, 84 of Tular, the safety distance of 10 mts. Should be maintained while planning for mining the same may be corrected in proposed development plan.
