(Technical Journals)

(A Monthly Current Awareness Service from Technical Journals)

Vol. 10 No. 06, June, 2026

The Central Library, IBM, Nagpur is subscribing the technical journals and also receiving them on complimentary basis on various subjects like Geology, Mining, Mineral Economics etc. These Technical Journals make up an important collection of latest scientific information. The library is rendering Reference Service to its users from these technical Journals (Article Indexing is one of them). Central Library, IBM provides Current Content Service from these technical journals in the name of "GEM" since 2006 on half yearly basis in print form. To expand this service to the IBM Offices all over India i.e. H.Q., Zonal & Regional Offices and to take a call of time, the Controller General, IBM desired to make this service online on monthly basis. The library staff made efforts to make it successful. This is the 6th issue of Volume-10 for this service named "तकनीकी पत्रिका विषय - सूची" (**Current Content- A Monthly Current Awareness Service from Technical Journals**) Vol. 10 No.06, June, 2026.

It will be highly appreciated if the valuable feedback is reciprocated. If some article as per content list is found to be of use by the reader the same may be requested and the library will send the scanned copy of the article to the interested reader.

TIN SOLDERS, FLUXES.

www.emmesmetals.com

We are one of the leading manufacturers of Non-Ferrous Alloys since 1961. We manufacture exceptionally diversified products like Aluminum alloys, Zinc alloys, Copper alloys, Lead alloys, Tin Solders, and fluxes. Our products are regarded for their quality and adhering to national and International Standards. We provide prompt response to inquiries and excellent delivery service to our customers including technical support. Alloy compositions are verified throughout the production cycle with our state-of-the-art spectrographs utilizing MBH standards. We are committed to maintaining our position at the forefront of emerging technology. We offer a variety of standard formulations, shapes, and sizes. We adjust compositions, forms, and quantities as necessary to meet customer requirements. We listen to our customers and then put more than Sixty years of accumulated knowledge into providing creative, cost-efficient solutions for your most difficult metallurgical requirements.
